QUALITY PEOPLE. QUALITY PROJECTS.

Field Personnel Webinar Series

Date: Wednesday, January 6, 2016
Time: 1:15pm – 2:15pm
Location: Webinar

Webinar Title: BUILDING ERECTION STABILITY – The Next Level of Construction Safety

Presenters: Raymond F. Messer P.E., DBIA, Senior Principal, Director of Design-Build, Walter P. Moore and Matthew Pavelchak, Associate, Walter P. Moore.

Program: There has been substantial focus on safety within the construction industry, with positive results, but usually with a focus on the specific worker protective gear, e.g., safety glasses, hard hat, proper shoes, gloves, safety belts and harnesses, etc. This session will focus on the next level of safety - the stability of the structure during erection. It appears that often there is not the same emphasis on erection stability as there is on personal protective gear. Examples will be shown of how simple missteps during erection caused major structural failures resulting in serious injury and loss of life. Presenters will include engineering and construction professionals.

Cost For Webinar: No charge for members, \$99.00 for non-members.

Please register for the *Webinar by end of the day on Monday, January 4, 2016*. You will receive login instructions by email prior to the event.
